

PA516-005

SERVICE BULLETIN PA516-005

Product: AM RF Power Amplifier

Subject: Firmware 1.5 Release

Date: 19th Januray 2009

Description

This Service Bulletin announces the release of baseline 1.5 firmware for the AM RF Power Amplifier (PA516) series products.

The version 1.5 firmware update file ("BIN") is available for download from the RFI website, and it may be flashed into existing PA516 models by following the *Terminal Commands - Download* process in the User Manual.

Product Enhancement

The version 1.5 firmware provides the following new features for the PA516;

- i) SET LVLDELAY command

The SET LVLDELAY command has been added to allow the Output Level Alarm to be delayed by a user-configurable time.

Compatibilities

Firmware version 1.5 is compatible with all models of PA516.

Cost Impact

Firmware version 1.5 is available to RFI customers at no charge.
