

DSPbR-009

SERVICE BULLETIN DSPbR-009

Product: DSPbR Rebroadcast Repeater

Subject: Firmware 5.2.0 Release

Date: 4th September 2014

Description

This Service Bulletin announces the release of baseline 5.2.0 firmware for the DSPbR Rebroadcast Repeater (DSPbR) series products.

Product Enhancements

The version 5.2.0 firmware adds the following new product features;

- i) Adds custom SMS reporting to BCR/BTR Alarm Management System (AMS) when polled and on Event Alarms.
- ii) Adds SMS reporting via binary format to BCR/BTR Alarm Management System (AMS).
- iii) Adds an alarm for the fibre connection in multi-rack systems.
- iv) Adds displaying the webserver GUI version on the *Version Register* page.
- v) Adds the DSPbR Cell Modem's status and RSSI values in the webserver GUI.

Upgrading to Firmware 5.2.0

Note: Please read all Service Bulletins published from the release of the firmware currently operating in your DSPbR prior to commencing an upgrade to this version 5.2.0 firmware. Upgrades may require a transition through an intermediate firmware version on the way to reaching this version - or may have other implications for your DSPbR.

Cost Impact

Firmware version 5.2.0 is available to RFI customers at no charge.
